A LITTLE
VOCABULARY
Englis^m and Latin,

For the Use of Little Children that
begin to learn the Latin Tongue.

By CHARLES HOOLE, M. A.

Corrected and Amended.

*Cum intelligitur quid significetur, minus laboran-
dum est de nomine. Cic. Topica.*

L O N D O N :

Printed for T. LONGMAN at the Ship in Pater-
noster-Row. 1748.

An Advertisement touching this Book.

THIS little Vocabulary is an *Extract* only of such Words as I used to note in the larger, to be as certain *Way-Marks* unto Childrens Memories, for the better learning of the rest; and to save my own Labour, and the Childrens Books somewhat, I have caused them to be here printed by themselves, as having their proper End; which is to teach little ones, how to call these Things in Latin, which are every Way obvious unto them; and whose Names they knew in English. And this we may observe to be the first Step towards the Gaining of any Language: What farther Use may be made of it, I leave to his Discretion that will teach it; only let me tell the new Beginner, that for his Help in pronouncing Latin Words, I have marked the Syllable thus ('), wherein he must set up the Sound above the rest: And to hint him a little towards his Grammar, I have caused the Ending of the Genitive Case of every Word to be set down, and the Letter denoting its Gender, viz. m. the Masculine, f. the Feminine, n. the Neuter, c. 2. the Common of two, and d. g. the Doubtful Gender.

And now that I have digged deep enough (as I conceive) for the Laying of a sure Foundation of the Latin Tongue in a Child that can (though but indifferently) read English, I will haste what I can (at By-times) in Works that come nearer to Perfection. Which that I may chearfully affect, God graciously vouchsafe his Assistance, as hitherto.

A minimis ad maxima.
